

Non-invasive study to assess retinal blood vessels in the eye

We are recruiting patients with **Alzheimer's, frontotemporal dementia, mild cognitive impairment, Parkinson's, Down syndrome, multiple sclerosis, PTSD, concussion, traumatic brain injury, dementia, or other neurodegenerations** for a study to take noninvasive pictures of the retina in your eyes. No x-rays, no eye drops and no eye contact. Compensation for time/travel.

You may be eligible for this research study if you:

- Do not have a significant head tremor
- Are not in a wheelchair
- Have not had prior retina surgery
- Are willing to have some undilated pictures of your retina

Email iMIND@duke.edu for further details! Please feel free to forward this message to friends or family members who may be interested in participating in this study. The study visit takes 30 minutes. No charge to you or your insurance.

The study is being conducted at the Duke Neurological Disorders Clinic, 932 Morreene Rd, Durham, NC 27705.
