

Advances in Pediatric Retina

September 18-20, 2025 • Washington Duke Inn • Durham, NC

JOIN US

in person for the fifth biennial Advances in Pediatric Retina (APR) Course, taking place September 18-20, 2025, in Durham, North Carolina. This two-and-a-half-day symposium will highlight the latest advancements in the diagnosis and management of a wide range of pediatric retinal diseases, with a focus on improving outcomes and minimizing complications. The program will feature engaging lectures, intraoperative surgical videos, and case presentations exploring diagnostic and surgical challenges, advanced imaging, emerging therapeutics, novel surgical tools and techniques, complication management, post-treatment outcomes, and innovations in telemedicine and artificial intelligence. Interactive expert panels will provide lively discussion and debate on recent advances and their real-world implementation.

MEETING TOPICS

- Retinopathy of Prematurity (ROP)
- Pediatric Retinal Diseases and Surgery
- Genetic Eye Diseases and Gene Therapy
- Imaging in Pediatric Retina (including ROP)
- Pediatric Retinal Tumors
- Coats' Disease and Exudative Retinopathies
- Pediatric High Myopia and Associated Retinal Findings
- Challenging and Complex Pediatric Retina Cases
- Hands-On Wet Lab
